

NEW *Fetal Heart Monitoring Course*

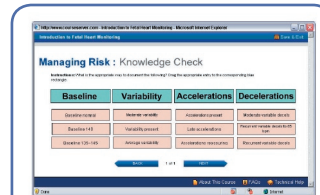

- Interactive exercises and knowledge checks
- Realistic graphics
- Embedded fetal monitoring strips
- Printable flow charts
- Recommended for nurses from novice through advanced beginner skill levels and clinicians new to labor and delivery units
- Essential for proof of competency for clinicians working with patients undergoing EFM, compliance with AWHONN Guidelines, compliance with ACOG Guidelines, and understanding NICHD terminology
- Fun, informative, and easy to use
- Accredited by AWHONN for up to 2.8 CNE credits

The Joint Commission reports that communication, staff competency, orientation and training and inadequate fetal monitoring are the major root causes in perinatal death and injury cases.

visit www.NurseTesting.com/FetalCourse for details

“This course is absolutely necessary to educate nurses and other caregivers in the basics of electronic fetal monitoring, and to assure competency in health care professionals who are managing these patients.”

Executive Director,
AWHONN

Interactive exercises allow students to master proper use of NICHD terminology and to document accordingly.
